EPOTEC

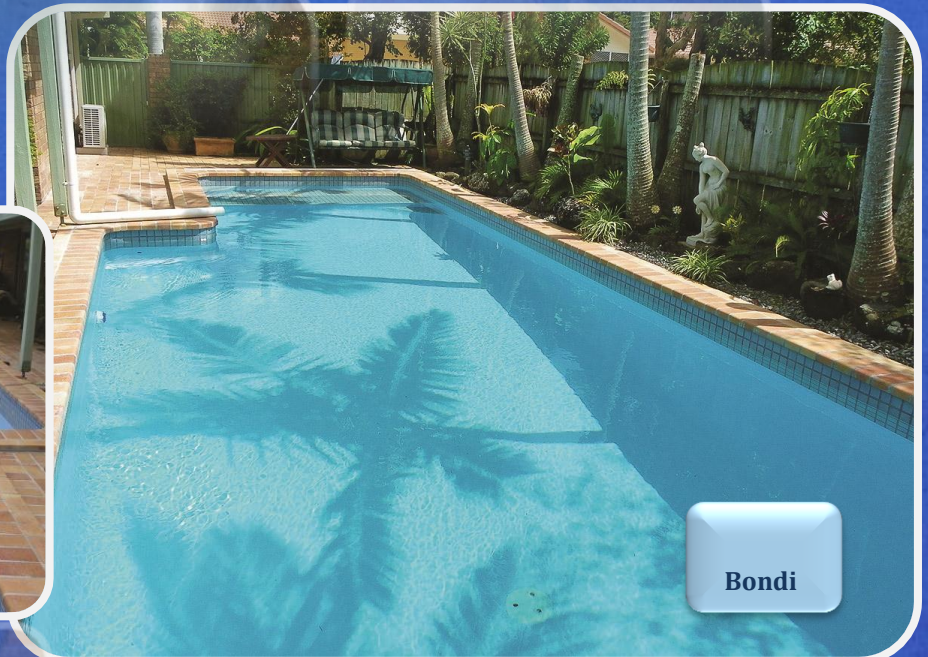

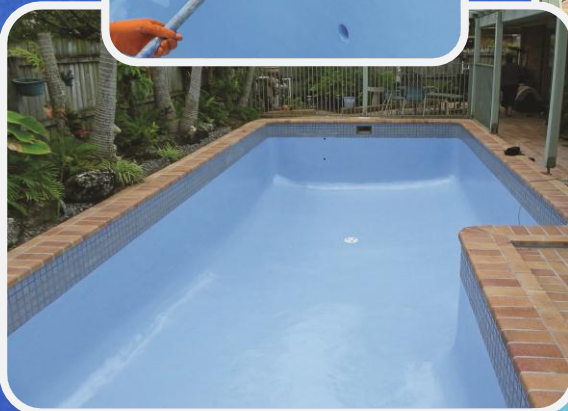

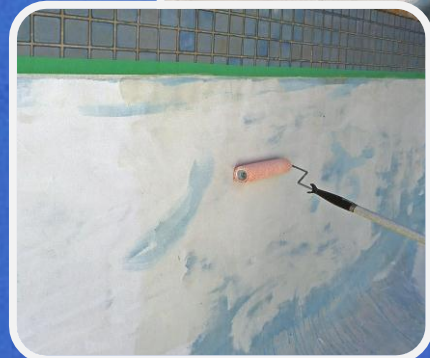

THE Proven Hi Build
Pool Coating

Water Based EPOTEC

Epotec WB is now available as a water based coating system bringing all the benefits of modern water borne technology to your pool. Application equipment washes up in water and Epotec WB is more environmentally friendly and easy to use.

This Marblesheen pool was well passed it's use by date. It was carefully prepared following our recommendations, by the owner's daughter. She carried out a wonderful application in colour Bondi. Margie said: "... the application was straightforward, though the Marblesheen repairs were a bit more extensive than thought initially, but the result is great."

The Epotec WB System comprises a sealer and two topcoats, all rolled on. After a week's curing it was refilled and is ready for many summers of enjoyable swimming.

Bondi

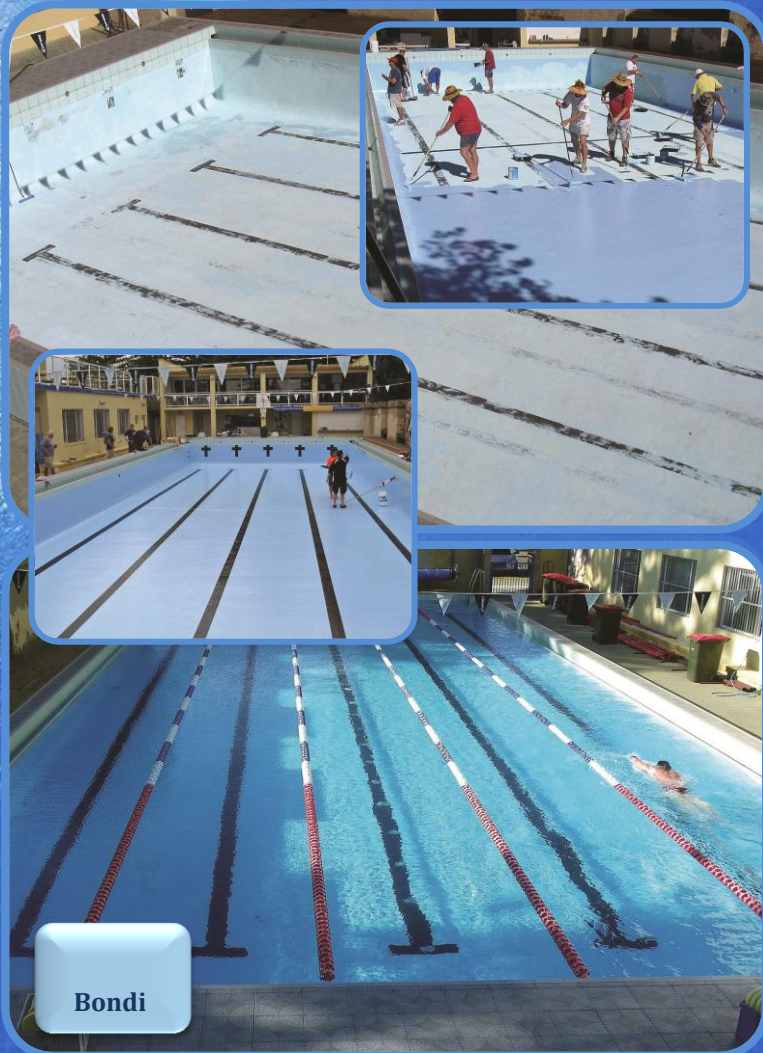

North Cronulla Surf Life Saving Club

This outdoor pool right by the beach and is enclosed by a high wall. However sand and salt spray blow in, creating a demanding environment, which is high wear and tear, not to mention from many active users.

The repainting was an excellent community effort with both club members and parents combining to get a great outcome for a pool which is used extensively for competition and training as well as learn to swim classes.

Preparation was started on Good Friday but due to 2 weeks of rain this was a setback and the pool had to have a light sand before the 2nd coat of Bondi could be applied. Then with weather holding the next day the swim lines were painted and the restoration was finally completed. After a few days to cure the paint, it was refilled and ready for use again.

The club are pleased with the outcome and as the photos show the North Cronulla SLSC pool looks at its sparkling best again for the many uses it serves for both members and the local community.

Painting of Plung Pool in Kings Langley

The pool was originally coated with " 2 pack Primer Sealer" and then finished in 2 coats of "Epoxy". I originally used only 1 pack of "Mid Blue epoxy" for the 2 coats so the viscosity must have been considerably less than that of Epotec. This could explain the degraded condition of the surface after only 4 1/2 years use with diligent water chemistry and periodic water exchange. (namely chalking with significant colour pick up on skin and also in the filter cartridge)

The pool has a surface area of just over 10 m sq and I used 2 packs of "Bondi Epotec epoxy" applied generously with a 12 mm nap roller.

Steve Hughes - the owner

"I'm very pleased with the results, it looks fabulous!"

EPOTEC, THE Proven Hi Build Epoxy Pool (and Spa) Coating is available for your pool. Be it Fibreglass, Marblesheen, Pebblecrete or Concrete. **EPOTEC** will give it a new lease of life. A life that's long lasting, economic and attractive. We work with you, DIY, with your painter or an Approved Applicator for a great finish, every time. Warranty available.
