New Pool Construction

New commercial pools are ideal to be successfully protected with **EPOTEC** hi build epoxy coating.

EPOTEC provides a proven, long lasting decorative and easy to clean surface in all types of commercial pools across the country.

Whether you have a community or thermal pool, water feature or spa project all will look great for longer when coated with **EPOTEC**.

- **EPOTEC** hi build epoxy coating is specially formulated for use in pools, 24/7. Unlike other epoxies it's hi build meaning you get a thicker, longer lasting surface.
- **EPOTEC** provides a seamless surface which makes keeping clean so much easier.
- **EPOTEC** comes in a range of attractive colours (or your own designer colours too)
- **EPOTEC** comes with a warranty when applied through Approved Applicators.
- **EPOTEC** can also be applied by council staff if required.
- **EPOTEC** can provide a nonslip finish on ramps and steps.
- **EPOTEC** is widely used in many commercial pools.
- **EPOTEC** has been used for over 25 years in the tough Australasian market.

Older Pool Refurbishment

Older pools in need of refurbishment will come up well when protected with **EPOTEC** hi build epoxy coating.

No matter if the pool is already painted, bare concrete, fibreglass lined, tiled, mineral finish or even ex vinyl liner, **EPOTEC** will create an as new finish.

Determining the right surface preparation is important to get a surface ready for coating.

EPOTEC will then provide for your project an attractive, hard wearing seamless surface that is easy to keep clean, long lasting and decorative.

Upgrading a Chlorinated Rubber painted pool to **EPOTEC** will also save money as the costs of emptying, recoating, refilling, plus chemical purchases, will be much less. Many councils and commercial pool owners have already discovered this aspect.

EPOTEC is ideal for Olympic, community, thermal pools and spas plus water features too.

- **EPOTEC** hi build epoxy coating is made especially for use in pools, 24/7. Being hi build means it goes on thick and lasts much longer.

- **EPOTEC** has no joints or rough edges, so it's seamless and easy to keep clean.

- **EPOTEC** is available in 12 standard colours and even in your designer colours too.

- **EPOTEC** comes with a warranty when applied through Approved Applicators.

- **EPOTEC** can also be applied by onsite staff if required.

- **EPOTEC** is readily made non slip for ramps and steps.

- **EPOTEC** is used widely in commercial pools across Australia.

- **EPOTEC** has been used for over 25 years in the tough Australasian market.
